Web Developer with over 5 years of professional experience in developing and enhancing user-friendly, responsive websites and applications. Skilled in ASP.NET, SQL, JavaScript and React. Passionate about creating efficient systems and delivering solutions that drive business success.

Professional Experience

Full-Stack Developer

Enico

August 2021–Present

- Designed and implemented a payroll system for medical university faculty, reducing calculation errors and improving efficiency.
- Rebuilt and optimized the UI for "Tabib" using React, improving navigation speed by 25%.
- Integrated Ministry of Health and Medical Education's Single Sign-On (SSO) system into the "Tabib" project, enhancing user authentication and streamlining access for medical professionals.
- Deployed Apereo CAS Single Sign-On (SSO) in the "Tabib" project, improving authentication efficiency and enabling seamless user access across integrated systems.

Web Developer Intern

Enico

March 2021–August 2021

- Developed a browser-based version of the popular 2048 game using vanilla JavaScript, HTML, and CSS.
- Built and tested CRUD applications using ASP.NET and Entity Framework.

Social Media Manager

Asak System

January 2019–August 2019

- Managed social media campaigns, growing engagement by 30%.
- Created engaging content to strengthen brand identity.
- Contributed to the "Cartridge Yab" website, indexing printer-cartridge compatibility to aid user searches.
